

# “Coffee a la Carte”

The perfect blend of convenience and European taste.

Offered exclusively by Filterfresh, our Coffee a la Carte program combines innovative brewing technology and gourmet coffees to bring you the perfect cup of coffee every time.

## Simple, efficient brewing

The Keurig Premium Coffee System takes all the guesswork out of brewing coffee. Coffee is brewed directly through disposable single-serve “K-Cups” with pressurized hot water, eliminating the mess and complicated procedure of traditional brewing. Each compact, individually sealed K-Cup protects the pre-measured coffee from air, light and moisture while controlling all of the critical factors in brewing. The result is a perfectly brewed cup of coffee every time!

## A taste of Europe in your cup
